

## 20<sup>th</sup> Avenue entrance and exit.

This is optional as there is an exits and an entrance at 18<sup>th</sup> which could have a deceleration lane..

Closing the right turn at 22<sup>nd</sup> would help with 22<sup>nd</sup> avenue intersection congestion. Access to Highway 97 is shown in green. Three way stop shown in red. There is an illumination highway light between the green lines but would not need to be moved.

This would also be useful for someone dropping off, picking up, or going to CNC as it gives them access to turn left at 18<sup>th</sup> Avenue that the 18<sup>th</sup> Avenue does not allow.
