

## Highway 97 off ramp to Griffiths and PGSS

This exit should be added (shown in green) it would eliminate that traffic from the 22<sup>nd</sup> intersection. The exit would include an exit to PGSS and yield and merge with through traffic to Griffiths. The right turn from Hwy 97 would be eliminated as would the old access road to PGSS shown with black boxes. Turning right would be accomplished by the existing exit at 18<sup>th</sup> Ave. Optionally an exit/entrance could be added at 20<sup>th</sup>.

Gravel from the excavation for the Village underground parking could be used for the off ramp. The Village would normally have to pay to haul the gravel some distance and pay to dump the gravel. Likewise the Province would need to buy gravel and haul it to the off ramp area. The Village could pay much less to haul it the few hundred feet to the ramp area where it could be spread and packed saving the both the Village and Province many thousands of dollars.
