

## Bus Stops

Bus stops on both sides of Griffith with the one being on by the “Village” underground parking. This bus would take people to the CNC bus stop and make it unnecessary to walk the intersection.

PGSS stops should be at the school , if possible at the back where there is no traffic yet students could wait inside the building. If you want students to use public transportation make the experience as good as possible.

### CNC bus routes

#46 CNC - Downtown – Pine Centre – Griffith Avenue 30 min trip 84% on time - hourly

#47 CNC to Pine Centre – Ferry – downtown 30 min every 60 min 83% on time - hourly

#88 from Hart Highway – CNC -Pine Centre – College Heights 1hr 85% on time – every 30 min

#89 from College Heights – Pine Centre - CNC to Hart Highway 1hr 80% on time – every 30 min

City bus stops should be where fire hydrants exist when possible because the area around hydrants is already clears on snow and would give a place for people waiting for the bus to be off the road.
